

Research and Clinical Space at the Northern General Hospital in the Clinical Research Facility

We now have some work space allocated at the Northern General Hospital with priority for Insigneo members and staff.

Details of available space:

1. A hospital bedroom which is completely fitted out with a bed and other equipment which can be used for patient research. There is a long corridor outside the room which could be used for walking tests etc.

To book this space, or to go and see if it is suitable for your research needs, please contact the CRF unit reception directly on telephone number 0114 2715779 (or 15779 if dialling internally).

They will need some details – patient name, study name etc. for health and safety reasons. Please say that you are from Insigneo.

2. Office space for up to 6 people. This has IT network points which cover both the hospital and the University. We will be putting a few desktop computers in the office, but initially the room will be for use with your laptop.

This space can be booked either for individuals or groups by emailing Alex Goode on email a.goode@sheffield.ac.uk or telephone 0114 2220158

Please see the website here for more details about the Clinical Research Facility at the Northern General Hospital:
